

(GB) Mounting Instructions – Quadry Wall Shelf

Uno - Duo - Tre - Quad - Penta - Quattro Comparti

Quadry is a minimalist design element for your interior that combines elegance with functionality.

Please read these instructions carefully before you begin.

If you follow the steps correctly, mounting your Quadry element on the wall will be quick and easy.

What You'll Need

- Electric drill with 8 mm drill bit
- Spirit level
- Pencil or centre punch
- The included template
- The included spacer
- M6 screws (included)

Mounting Procedure – Step by Step for Horizontal Positioning

1.Position the template on the wall where you want to hang your Quadry element.

Use a spirit level to ensure the template is perfectly horizontal.

2.Horizontal installation (landscape position):

On the template, the drilling points are marked with the letter **B**.

These indicate where to drill using an 8 mm drill bit.

3.Mark the drill holes:

Use the centre punch to make small indentations on the marked points.

This will show you exactly where to drill.

4.Drill and insert the plugs:

Drill the holes, place the wall plugs, and prepare for mounting.

5.Importantly:

Do not tighten the screws completely against the wall.

Use the small spacer supplied in the package — this ensures enough distance between the wall and the screw heads.

6.Before final mounting:

Before sliding the shelf fully into the bayonet slots, attach the shelves to the back of the frame using the M6 screws provided.

7.Now you can hang the shelf:

The screw heads fit into the holes of the bayonet mount.

Make sure to slide the shelf fully downward into the bayonet slots so it locks securely in place.

And that's it — you're done!

Tip

Before final tightening, use the spirit level once more to make sure the shelf is perfectly straight.

This ensures a clean and professional result.

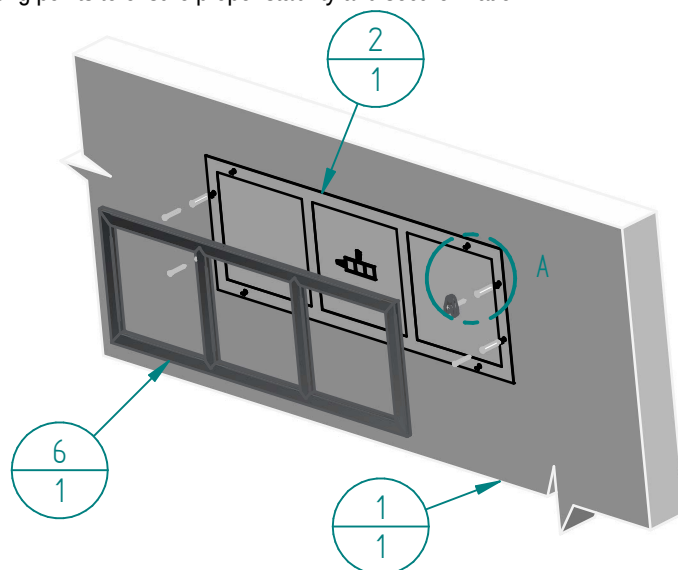

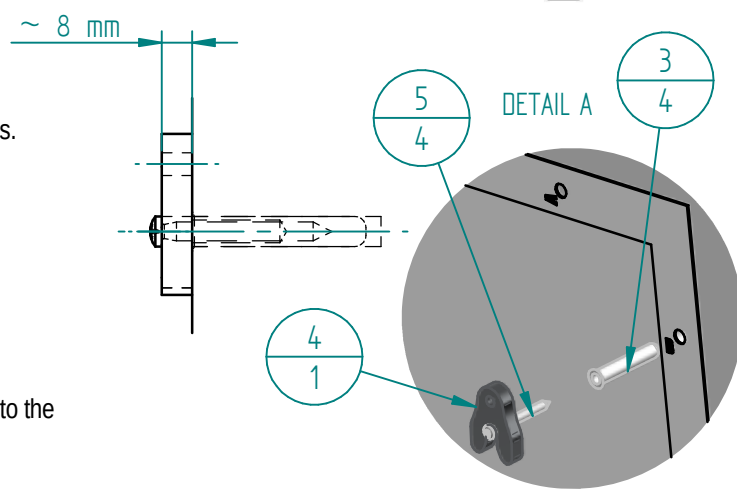

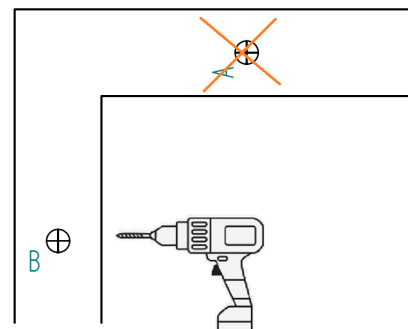

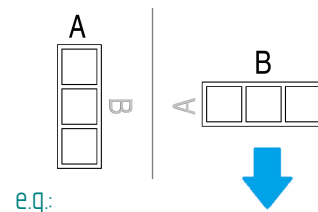

Mounting Procedure – Step by Step for Vertical Positioning

For vertical installation, follow the same procedure as described above.

However, drill the holes where you see the capital letter "**A**" on the template.

Important:

If you have chosen a taller shelf, make sure to create at least three mounting points to ensure proper stability and secure fixation.

Item	Piece	Description	SUM	CAUTION
1	1	Wall	0,000 kg	
2	1	DRILLING TEMPLATE PAPER	0,033 kg	
3	4	Shark twist wall dowel 8x46	0,006 kg	
4	1	Quadry - Gap adjuster	0,048 kg	
5	4	D-head chipboard screw 5x45	0,029 kg	
6	1	Quadry Tre	3,192 kg
