

(GB) Mounting Instructions – Quadry Tre Comparti and Quadry Sei Comparti

The Quadry Tre Comparti and Quadry Sei Comparti are elegant and functional wall shelves that, thanks to their smart design, can be mounted in multiple orientations. The frame is constructed so that it can be rotated around its axis, allowing for different mounting positions — for example, left- or right-ascending, or in a reversed horizontal arrangement. This versatility allows you to adapt the shelf to the style and layout of your interior, ensuring it fits perfectly in any space.

What You'll Need

- Electric drill with 8 mm drill bit
- Spirit level
- Centre punch
- The included template
- The included spacer
- The included wall plugs
- The supplied M6 screws

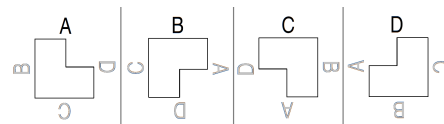

Mounting Procedure – Step by Step

- 1.Position the template on the wall in the orientation you prefer, using a spirit level to ensure it is perfectly straight.
- 2.On the template, you will find the four capital letters A, B, C and D.
- Depending on the mounting orientation you have chosen, select the corresponding letter A, B, C or D.
- 3.Mark the drill holes:
Using the centre punch (which has a sharp point), mark the selected drilling points on the wall.
This shows you exactly where to drill.
- 4.Drill and insert the plugs:
Drill the holes and insert the wall plugs into place.
- 5.Importantly:
Do not tighten the screws completely against the wall.
Use the small spacer included in the package – this ensures there is enough distance between the wall and the screw heads.
- 6.Before final mounting:
Before sliding the shelf completely into the bayonet slots, attach the shelves to the back of the frame using the supplied M6 screws.
- 7.Now you can hang the shelf:
The screw heads fit into the holes of the bayonet mount.
Make sure to slide the shelf fully downward into the bayonet slots so it locks securely in place.

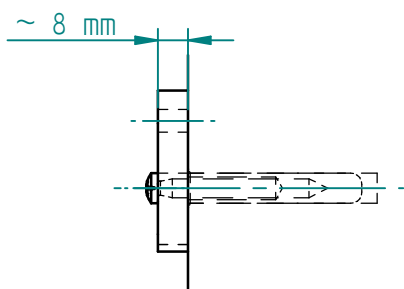

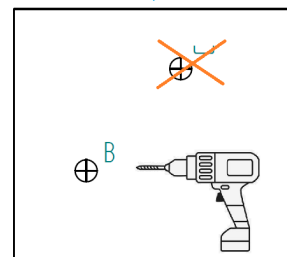

And that's it!

Your Quadry Tre Comparti or Quadry Sei Comparti is now securely installed and ready to enhance your interior with a timeless, minimalist look.
